Note: Speed was calculated using GPS with 300 gallons of fuel, 25 gallons of water, 625 lbs of people & gear aboard. The tested boat weight was 24,400 pounds and included the second station and seakeeper. The data was collected on 10/18/19. Fuel flow was taken from the engine displays. All values were averaged in two directions. Range is calculated off of 95% fuel capacity and is shown in statute miles. Performance results can be affected by many factors including vessel loading and weather conditions. The reported performance, acceleration and fuel burn are not guaranteed.
