Note: Speed was calculated using GPS with 135 gallons of fuel, 20 gallons of water, Seakeeper SK1 and 810 lbs of people & gear aboard. The tested boat weight was 11,525 pounds. The data was collected on 5/18/22. Fuel flow was taken from engine displays. All values were averaged in two directions. Range is calculated off of 95% fuel capacity and is shown in statute miles. Performance results can be affected by many factors including vessel loading and weather conditions. The reported performance, acceleration and fuel burn are not guaranteed.
